Our goal

We help people,
households and society in
general, to be more
sustainable.

With this ecological replacement
of make-up removal tampons,
we teach people about negative impact of disposable
tampons on environmental issues
in the world.

Cotton tampons

Cotton tampons:

- made of cotton wool which production is bad for our planet
- needs a lot of water
- for 1kg of cotton 2000lit. of water is needed
- due to cotton production, water areas are drying
- their structure isn't that good to be washed or used repeatedly
- chemical processes are used with their production

BADAK

BADAK Eco tampons:

- less waste is produced thanks to their shape
- can be used repeatedly
- better for skin
- they save money
- produced with love and care

Main product

As it was said, our main product are eco BADAK tampons. BADAK eco make-up removal tampons are made from recycled polyester. Our product lasts longer than ordinary disposable tampons, this saving not only our environment, but also our wallet.

Tampon size is 5x5 cm.
They are nice turquoise color.

Other products

Made in shambala style with simple binding.

Range of semi-precious stones and strings is very wide. Variety of strings: black and red. Semi-precious stones: tiger's eye, rose quartz, aqua aura, turquoise, hematite, amazonit.

As our bi-product we have chosen minimalistic bracelets and earrings, which contain semi-precious stones.

Operations

We have made all our products hand-made and with precision in quality.

Delivery:

- the products were sold to customers personally on chosen place.
- we try to deliver our products as fast as possible.
- we invested the profits into buying new material

Strategies

Our products are not verified yet, but we have tried to choose them according to the fashion trends and ecological qualities.

We have found out that by social networks we can gain a lot of customers and propagate our company.

You can find us on instagram [badak_sf](#), where we sell our products and share information about our products and news.
